Summary

Data-driven Software Engineer with 3 years of experience building backend services and analytics pipelines. Comfortable across Python, SQL, and cloud tooling, with a growing focus on applied machine learning.

Skills

- Programming: Python, Java, JavaScript, SQL
- Data & ML: Pandas, NumPy, Scikit-learn, Data Analysis, Data Visualization
- Web & Backend: REST API, Flask, Django, Node.js
- Cloud & DevOps: AWS, Docker, Git, Linux
- Databases: MySQL, MongoDB
- Other: Communication, Project Management, Agile/Scrum

Experience

Software Engineer — Nimbus Tech Solutions

Jun 2022 – Present, Delhi, India

- Built and maintained REST APIs in Python (Flask) serving 50K+ daily requests.
- Designed MySQL schemas and optimized queries, reducing average response time by 30%.
- Automated reporting pipelines using Pandas, cutting manual analysis time by 10 hours/week.
- Collaborated with cross-functional teams in an Agile/Scrum environment.

Junior Developer — Codeverse Pvt. Ltd.

Jul 2021 – May 2022, Gurugram, India

- Developed internal dashboards using Python and SQL for sales tracking.
- Wrote unit tests and used Git for version control in a team of 6 engineers.

Projects

- Customer Churn Predictor: Built a churn-prediction model using Scikit-learn and Pandas, achieving 84% accuracy.
- Expense Tracker API: Designed a Flask + MongoDB REST API with JWT-based authentication.

Education

B.Tech in Computer Science — Delhi Technological University

2017 – 2021

Certifications

- AWS Certified Cloud Practitioner
- Python for Data Science — Coursera
